

	PAPER NO: EC.14(12)	
Board/Committee:	Educational Character Committee	
Date:	10 December 2012	
Paper title:	National Student Survey Overview 2012	
Author:	Jo Ellett, Academic Quality Project Manager	
Executive sponsor:	Phil Cardew, Pro Vice Chancellor (Academic)	
<b>Recommendation by the Executive:</b>	To note the National Student Survey Overview 2012 Report	
Aspect of the Corporate Plan to which this will help deliver?	3. Student Choice 4. Student Success 6. Creating an environment in which excellence can thrive	
Matter previously considered by:	Quality and Standards Committee / Academic Board	On: 10th October 2012 / 7th November 2012
Further approval required?	No	On:
Communications – who should be made aware of the decision?	Not applicable	

### **Executive summary**

This paper:

- Provides a summary of the University's scores in the National Student Survey 2012, which impacts on LSBU's league table rankings;
- Provides comparison against sector scores;
- Identifies trends, including areas of improvement and issues to be addressed by the LSBU Student Satisfaction Action Group.

The Committee should note:

- LSBU has seen an increase in student satisfaction in **all** of the key NSS categories.

- The major areas of improvement are Assessment & Feedback, Academic Support and Organisation & Management.
- We are still below the sector scores in most key areas except Personal Development, where we equal the sector score of 81%.

## National Student Survey Overview 2012

### Introduction

- The NSS is a national survey commissioned by HEFCE and carried out by the market research agency Ipsos-Mori.
- The NSS questions all undergraduate and sub-degree students funded by HEFCE or the NHS who would be completing their programmes in the summer following the January in which the survey is opened.
- The LSBU overall response rate has increased by 4% this year to **64%** (LSBU benchmark target = 70%).
- The sector response rate has increased by just 2% to 67%.
- LSBU has seen an increase in student satisfaction in **all** of the key NSS categories.
- Improvements mirror the increase in satisfaction seen across the sector. therefore we still have more to do to close the gap between LSBU and our competitors.

### Overall Satisfaction

Sector: 85%	LSBU: 80%
-------------	-----------

Overall Satisfaction has increased back to our score in 2010, 2009 and 2007 of **80%**. This score is still 5% behind the sector score which has been steadily increasing since the beginning of the survey.

Satisfaction has increased across all key demographic and ethnic groups. Most notable is the **80%** overall satisfaction which was recorded against both young and mature students. This is the highest level of satisfaction seen in LSBU's young students since the beginning of the NSS.

Of most concern is the further drop in overall satisfaction among part time (PT) LSBU students. With full time (FT) students recording a 4% **increase** in satisfaction on 2011 to **82%**, PT student satisfaction has **dropped** for a second year running to **71%**. The PT satisfaction trend is one that fluctuates by up to 6% around the 75%-80% score so for satisfaction to drop to 71% is significant.

## Teaching

Sector: 86%	LSBU: 81%
-------------	-----------

Satisfaction with teaching has also seen a return to our 2010 and 2009 score of 81%. The disparity between LSBU and the sector has decreased from 6% in 2011 to 5%.

The majority of comments focused on the excellent experiences students have had being taught by staff at LSBU. Many students pick out lecturers or modules which have made their experience at LSBU highly inspirational. However, the variability of skill and attitude between lecturers was remarked upon.

## Assessment and Feedback

Sector: 70%	LSBU: 68%
-------------	-----------

We have seen a 6% increase in satisfaction with our methods of assessment and feedback. This is the highest increase in satisfaction in all of the key NSS areas and sees us only 2% below the sector score. However, this area continues to be the University's lowest scoring area.

The issues students have with feedback centre on the expected areas. Students feel that in some modules the feedback is still not returned promptly and is still not detailed enough. They are also keen to have personal feedback rather than a group mark or an overview of the progress of their peer group.

Detailed feedback is strongly linked to student opinions about academic support, with students requesting more communication with the marker of their assessment in order to gain clarity about their performance. Due to the nature of their mode of study, PT students in particular require a greater amount of detail in the feedback that they receive and assistance in clarifying things they do not understand.

## Academic Support

Sector: 79%	LSBU: 73%
-------------	-----------

Satisfaction with academic support has increased by 5% this year to our highest ever score of **73%**. It is possible that improvements in assessment feedback have had an impact in this section of the NSS, as students feel that they are receiving study advice from more effective comments and feedback sessions.

A key difference has been the students' ability to contact staff when they needed to. In this area we have improved by 4% since last year to **77%**. However, we should note that the NSS shows we are still 6% below the sector score of 79% in this area. Many students called for more use of one-to-one sessions and seminars, but if they cannot contact academic staff in person, they would appreciate email contact.

### Organisation and Management

Sector: 77%	LSBU: 71%
-------------	-----------

With a satisfaction level of **71%**, LSBU is 6% below the sector score. LSBU has improved by 2% in this category since 2011, mirroring that in the sector as a whole.

Comments about the organisation of the programme were largely focused around the timetable. Students want accurate timetables, in advance, that are not subject to too many changes throughout the year. If changes are necessary, these should be communicated quickly and clearly in advance. This is most important for students who have jobs and/or children so that they can arrange cover for these activities.

### Learning Resources

Sector: 82%	LSBU: 78%
-------------	-----------

With a score of **78%**, students are largely satisfied with the library and IT resources available to them. This score is still 1% off our highest score in this area of the NSS and is 4% below that of the rest of the sector.

The area which continues to lower the overall score is access to specialised equipment, facilities or rooms. This score is 7% below the rest of the sector and the University should identify where students are requiring additional resources.

### Personal Development

Sector: 81%	LSBU: 81%
-------------	-----------

In the area of Personal Development satisfaction is at an all-time high at **81%**, equalling the sector score.

## **AHS**

Six of the seven AHS departments scored an overall satisfaction rate of 75% or over. This is a significant improvement on last year's scores, when only three of the departments achieved this result. Of particular note is **Law**, which has achieved an overall satisfaction score of 90%. Two of the departments received an overall satisfaction score of 5% or less than the LSBU score. In particular **Arts and Media** received the lowest overall satisfaction rate in the University.

## **BUS**

Overall satisfaction results show that BUS students are largely satisfied. Of particular note are **Accountancy and Finance** which again scored very highly in overall satisfaction at **91%**, the highest in BUS, and **National Bakery School** again scoring the lowest level of overall satisfaction in the faculty with 71%. It should be noted that the small sample base for this department can cause distortion in the results.

## **ESBE**

Overall satisfaction rates for ESBE were lower than those for LSBU in all departments; however **Applied Sciences** and **Engineering and Design** came very close to matching the LSBU level with **79%**. The least satisfied department was **Built Environment**, although both this department and **Urban Engineering** have seen a significant reduction in overall satisfaction.

## **HSC**

Sample issues have affected HSC this year, which have limited the way in which data can be compared with that of previous years: The results for two departments have been gathered via an internal survey with the response rates for these departments being lower than those for the national NSS and some department categories have been changed since 2011, with only a few similar enough to enable comparison.

Of the nine departments this year, only one scored a lower rate than the LSBU average for overall satisfaction. Two departments scored 5% or more above the sector score, with **Allied Health Professionals** achieving the highest level of satisfaction in the University. **Occupational Therapy** scored the lowest in HSC in terms of overall student satisfaction, although marks displayed against this department will be distorted as a result of the small sample base.

## National Student Survey Overview 2012: Appendices

### Acronyms of academic departments

AAMED	Arts and Media
ACWP	Culture, Writing and Performance
AED	Education
ALAW	Law
APSY	Psychology
ASPS	Social Sciences
