

STUDENT PROFILE AND PROGRESSION ANALYSIS REPORT

26 October 2011 (data generated 10-19 October 2011)

Suzy Kerr Pertič, Pro Dean, AHS

STUDENT PROFILE: KEY TRENDS

- See attached Excel report with detailed analysis of 2010-2011 and 2009-2010 Year 1 UG FT and PT student profile by Department, Faculty and LSBU.
- Detailed analysis for PG FT/PT will be carried out in Jan/Feb 2012 for PG PMR deadline.
- A summary of UG FT/PT and PG FT/PT student profile can be found in this report on pp. 3-4.
- In 2010-11, AHS, BUS and ESBE enrolled more Year 1 UG FT students than in 2009-10. HSC UG FT student numbers declined. In 2010-11, Year 1 UG PT student numbers declined in AHS, BUS and ESBE (223, down from 357). HSC UG PT students grew by 5 students.
- The Year 1 undergraduate student profile in each of the four faculties is significantly different, and these differences are masked when LSBU undergraduate student data is aggregated. There are also notable differences between the FT UG student profile and the PT student profile.
 - **Gender.** UG FT female students are HSC 86%, AHS 62%, BUS 40%, ESBE 25%, averaging 55% for LSBU. Gender distribution across faculties has changed little from 2009-10. Gender distribution within faculties varies greatly between departments, clearly determined by subject area. A greater proportion of PT students are female, notably in Business - HSC 86%, AHS 64%, BUS 70%, ESBE 9%.
 - **Ethnicity.** UG FT White students are the largest ethnic group in HSC 47% (4% increase from 2009-10), AHS 39% (6% less than 2009-10) and ESBE 28%. Black African students are the largest ethnic group in BUS 27%. The ethnicity of UG FT students differs between departments, but Black African or White students are the largest group in any department. There is growth in UG FT Other ethnicity students in AHS and BUS, undoubtedly reflecting London's growing young mixed race population. A greater proportion of PT students are white, up in AHS and ESBE and down in BUS and HSC.
 - **Age.** The most significant change since 2009-10 is the growth in UG FT students age 21 and under, nearly half of all UG FT LSBU students. The increase across LSBU was 14%, and in AHS 18%, BUS 15%, ESBE 11% and HSC 7%. PT students are mostly aged 25 to 39 in all faculties.
 - **Fee status.** In 2010-11 Overseas students increased slightly in AHS and decreased slightly in BUS, ESBE and HSC. EU students decreased in AHS, BUS and HSC and remained steady in ESBE.
 - **Entry qualifications.** Clearly linked to the increase in students aged 21 and under, more UG FT students in 2010-11 enrolled with A Levels, the dominant entry qualification in AHS 48% (up 4%), BUS 33% (up 4%) and ESBE 32%. The dominant entry qualification in HSC was HE Quals (31%) but students entering with A level increased to 28% (up 10%). There is also a marked increase in all four faculties in students with BTEC qualifications. PT students in all faculties are more likely to enrol with HE Quals. UG PT students in HSC are 75% Not Known Entry Quals. The decrease in Other entry qualifications could be linked to improved recording processes at enrolment or a decline in EU students, rather than a change in actual qualifications.
- The 2010-11 LSBU FT UG student was younger, and mostly entered with A Level or BTEC qualifications (AHS 69%, BUS 50%, ESBE 55%, HSC 38%). Following 2011-12 enrolment, this trend is likely to be more pronounced. Increasingly, there is no typical LSBU UG profile, but rather distinct faculty profiles.

PROGRESSION: KEY TRENDS

- Page 4 presents UG FT/PT, UG FT and UG PT progression across LSBU and by Faculty, indicating where progression improved or declined on 2009-10, and where it meets the benchmark (green cell). Year 1 progression has improved in AHS, BUS and ESBE but remains below benchmark. Year 2 is closer to benchmark but has declined except in AHS, above benchmark. Year 3 and 4 are below benchmark.
- Pages 5-6 present UG FT and PT progression by department, against benchmark and indicates where progression improved or declined on 2009-10. HSC data remains provisional due to volume of missing data
- Pages 7-8 identify students who progress better than others in the profile group.
 - Gender does not appear to be a significant determinant for progression.
 - Age is significant, and students age 21 and under are far more likely to progress.
 - Ethnicity patterns are differentiated across faculties, with less obvious progression correlations.
 - Disability indicates that classifications DSA N/K and No DSA are typically less likely to progress.
 - Entry quals are very significant, and students with A Level in AHS/BUS or Access in BUS/ESBE and HSC progress best. Data analysis clearly links age on entry with entry quals.
 - The Student Success Project will be important in exploring success correlations.
- Page 9 summarises interim Postgraduate progression across LSBU and by Faculty. Detailed departmental analysis will be undertaken to coincide with PG PMR reporting cycle later in the academic year.
- The attached Excel report provides comparison of Home, EU and Overseas UG FT progression by Faculty from 2007/08 to 2010/11. Red highlighting indicates Overseas progression is lower than Home progression. In 2010-11, lower Overseas student progression was most marked in Year 1 AHS (4% lower) and Year 1 BUS (28% lower) and Year 3 ESBE 99% lower).

PROGRESSION ANALYSIS

The progression benchmarks for 2010-2011 are:

- UG Year 1 @ 70%
- UG Year 2 @ 75%
- UG Year 3 and Year 4 @ 90%
- PG all years @ 90%
- Green highlighting indicates when benchmark met

PROGRESSION FT AND PT UNDERGRADUATE COMBINED

There is significant missing data (students with no exam board decision) in 2008/09, 2009/10 and 2010/11 reports for LSBU, BUS and HSC, which will affect overall progression data.
